EDUCATION

Panimalar Engineering College, Chennai

Bachelor of Technology (B.Tech) — Information Technology, CGPA: 8.85 / 10

2023

EXPERIENCE

VAPT Engineer

1.9 Years

Syncfusion

Chennai, India

- Performed Vulnerability Assessment and Penetration Testing (VAPT) of web applications and infrastructure using Burp Suite, Nmap, Kali Linux and Metasploit, identifying and validating security vulnerabilities based on risk, severity and exploitability.
- Supported security remediation by analyzing findings, documenting technical evidence, prioritizing vulnerabilities and following up with relevant technical teams on corrective actions and closure.
- Contributed to DAST/security testing automation and DevSecOps initiatives using OWASP ZAP, SonarQube, Trivy, Gitleaks and Checkov, integrating security checks into CI/CD pipelines and automated build workflows.
- Applied OWASP principles, ISO/IEC 27001 concepts and security best practices when assessing vulnerabilities, security controls and remediation requirements.
- Prepared vulnerability findings and security-status information for stakeholders, improving transparency of open findings, remediation status, risk trends and security controls.

Network Engineer

1 Year

Syncfusion

Chennai, India

- Managed and troubleshooted enterprise network infrastructure including switches, routers, DNS, DHCP, NAT, VPNs and firewalls, supporting secure and reliable connectivity across business environments.
- Monitored security and infrastructure events using SIEM and network-security tools, investigated anomalies and escalated potential security issues according to severity and business impact.
- Supported Microsoft 365, Entra ID/identity administration, Intune and endpoint security operations, including access controls, device management, configuration and security-related troubleshooting.
- Implemented network-security controls and troubleshooting procedures aligned with organizational security standards, contributing to improved infrastructure resilience and risk reduction.

Network Engineer

5 Months

Daphne Infotech

India

- Supported enterprise network operations involving switches, routers, TCP/IP, DNS, DHCP, VPN and firewall troubleshooting, resolving connectivity and configuration issues across user and infrastructure environments.
- Assisted with network security monitoring and incident troubleshooting, analyzing connectivity and access issues and escalating security-relevant events to appropriate teams.
- Performed system and network troubleshooting across Windows and Linux environments, supporting secure configuration, patching and operational availability.
- Maintained technical documentation and followed structured incident-resolution procedures to improve consistency and reduce recurring infrastructure issues.

PROJECTS

DevSecOps Security Pipeline | GitHub Actions | SonarQube | Gitleaks | Trivy | Checkov | OWASP ZAP | Terraform | Kubernetes

- Built a DevSecOps CI/CD security pipeline integrating SAST, SCA/dependency and container security, secrets scanning and IaC security checks.

- Implemented SonarQube/SAST quality gates, Gitleaks, Trivy and Checkov to identify vulnerabilities and security misconfigurations before deployment.
- Configured OWASP ZAP DAST testing for web-application security validation and incorporated security testing into the software delivery lifecycle.
- Automated security validation across application source code, dependencies, container images and Terraform/Kubernetes configurations.

TECHNICAL SKILLS

Application Security: VAPT, DAST, SAST, SCA, Vulnerability Management, Risk Assessment, OWASP, Secure SDLC/SSDLC, Security Testing

Security Tools: Burp Suite, OWASP ZAP, Nmap, Metasploit, Kali Linux, SonarQube, Trivy, Gitleaks, Checkov

DevSecOps: CI/CD, GitHub Actions, Security Gates, Automated Security Testing, Terraform, Kubernetes

Security Monitoring: Wazuh, Splunk, SIEM, Zeek, Security Monitoring, Incident Analysis

Cloud & Infrastructure: AWS, IAM, Security Groups, NACLs, Linux, Windows, Firewalls, VPN, DNS, DHCP, NAT

Microsoft: Microsoft 365, Entra ID, Intune, Endpoint Management

Standards: OWASP, ISO/IEC 27001, CIS Controls, NIST

LANGUAGES

English: Professional working proficiency German: Currently learning
